

Instructions for the counter

1. Teams independently record their decisions using a Google spreadsheet or the attached table, specifying the number of each element they placed on the board, cost and maintenance.
2. Please ensure they do not change the spreadsheet's structure.
3. Paste the data into the yellow fields.
4. The spreadsheet automatically counts all points earned, as well as the cost limit used.
5. If the cost limit is exceeded, the field is highlighted in red.
6. Conditional formatting is enabled for the points earned, with a gradient: green = good, red = bad. The gradient is set separately for the main effect group and for bonuses.
7. For the individual events described in the presentation, formulas are visible after scrolling in the rows below the table with the base score. It's a good idea to set the zoom level so that only the
